

How to Grow the Perfect Mango

The Prefect Mango

- 1.Sunshine:** minimum of six hours of direct sunlight per day.
- 2.Temperature:** between 24 to 27 degrees Celsius.
- 3.Water:** consistent watering, but should not be overwatered.
- 4.Soil pH:** slightly acidic to neutral pH levels, around 5.5 to 7.5.
- 5.Nutrients:** Mango trees need a balanced diet of nutrients.
- 6.Pruning:** improve fruit production

The Governmental Mango Growing Advise

1.Overwatering or Poor Drainage:

“waterlogged roots and, eventually, root rot? The science has changed since 2020!”

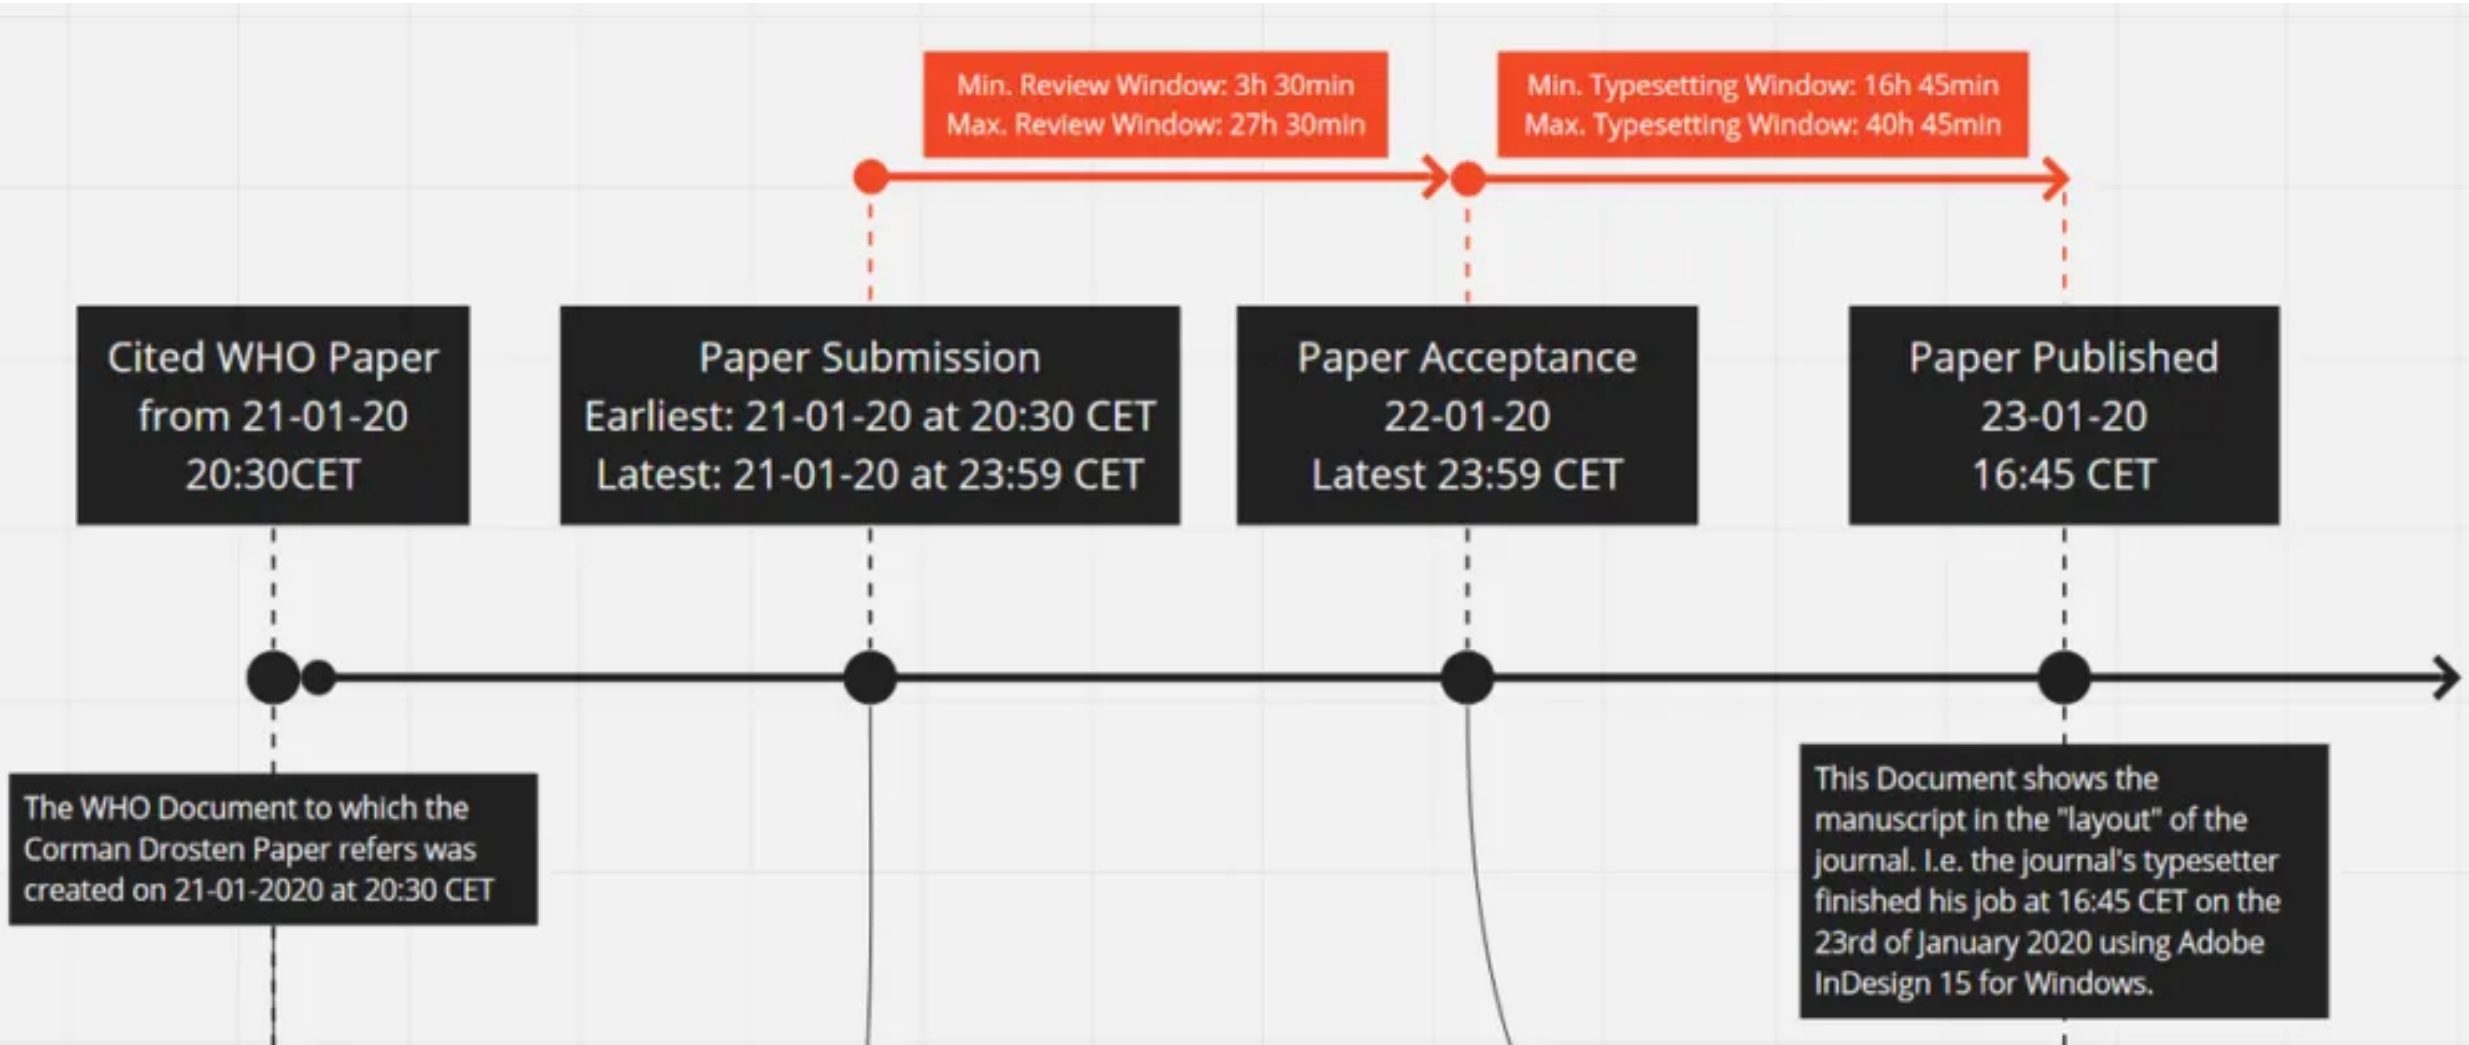

2.Inadequate Sunlight: “Sunlight does not matter, Mango trees do not need 6 hour of sun per day. Listen to the experts!”

3.Ignoring Soil pH and Nutrient Balance:

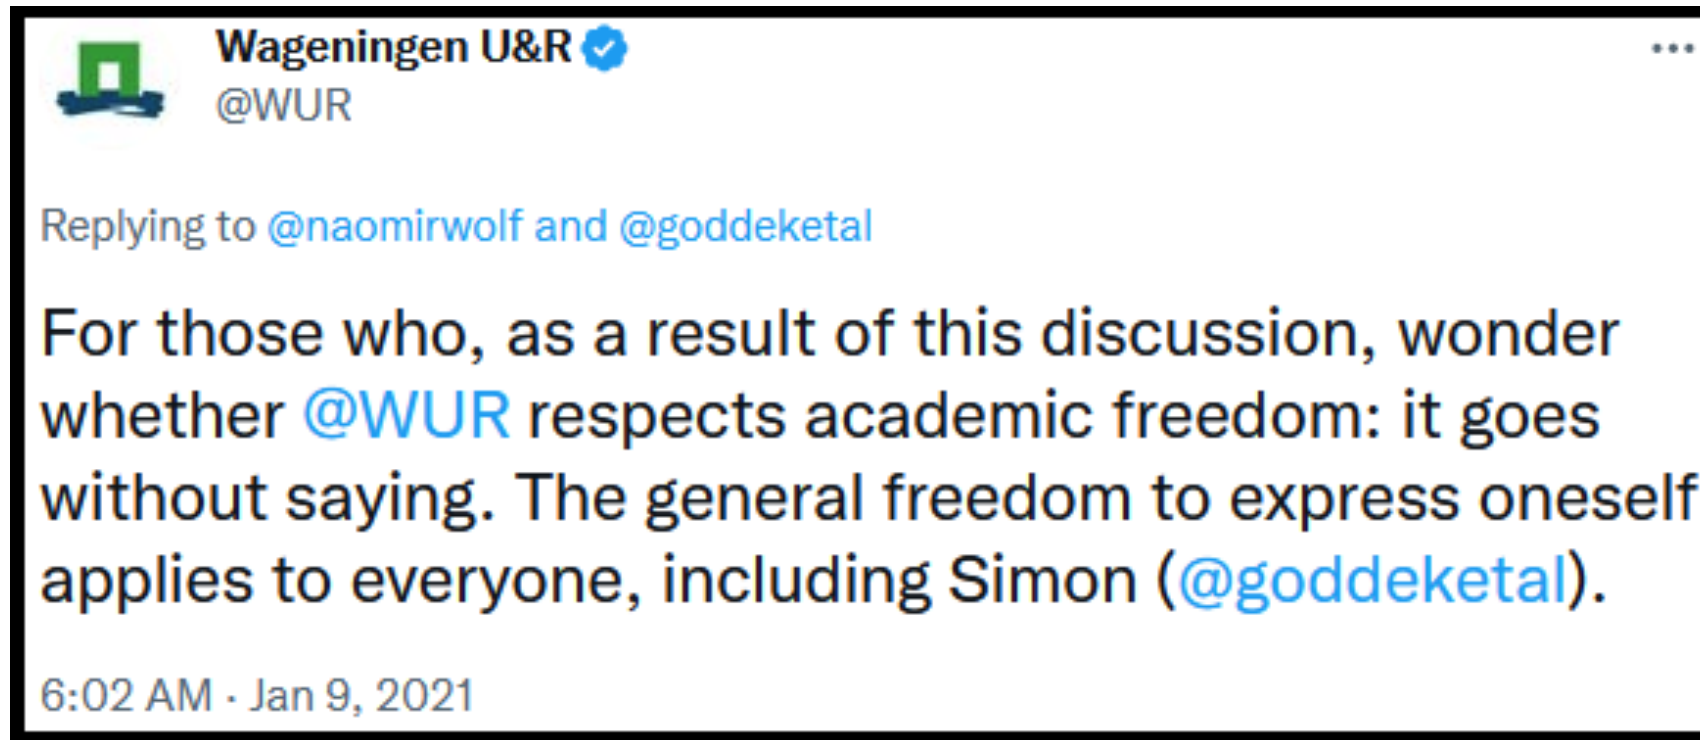

“Ignore the pH, it does not matter, you bloody conspiracy theorist!”

Science, guys, SCIENCE! A German peer-reviewed meta-analysis shows that masks can lead to massive health damages. Is @twitter also going to censor this scientific paper, and put those who tweet about it to Twitter jail? You can find the link to the study in the tweet below. [↓](#)

People have died being denied access to safe, effective, cheap, and available therapeutics, such as Ivermectin and Vitamin D because Big Pharmafia and the associated scientists™ and regulators prevented their use. The blood is on their hands.

22/: And which role does @pfizer/@BioNTech_Group play here, who began developing the #COVID19 vaccine on January 10th 2020 (!!!), even though nobody outside of China was infected back then? And why did @gatesfoundation invest US\$ 55,000,000 into BioNTech in Sept. 2019?

Hello @AlastairMcA30, I wanted to check in and see if your position on this statement you made previously has changed. (bit.ly/3wDzcLy)

Alastair McAlpine, MD

@AlastairMcA30

Fact: The Covid vaccines are incredibly effective (100% against severe disease!)

Fact: The vaccines are very very safe (severe reaction 0.005% AT WORST. No deaths).

Anyone who tells you otherwise is simply incorrect. Or has an agenda.

Hey @DrLeanaWen - 15 months ago, you said that unvaccinated people should not be allowed to leave their homes. If it were up to me, you would not be allowed to leave your isolation cell for the rest of your life. The US is not China! Keep your authoritarian mindset to yourself.

CNN's Leana Wen: The Unvaccinated Should Not Be Allowed To Leave Their Homes

"You have the option to not get vaccinated if you want," said the doctor. "But then you can't go out in public."

Good morning to everybody but @Clint_ZA.

I am an African

@Clint_ZA

Call me malicious, but I'd love #COVID19 to mutate into a virus that causes almost instant death to the unvaccinated. I'd sit watching how they suddenly rush out to get vaccinated... and fall over dead in the queues waiting.

Yes, I told you, I'm fucked off with them.

Hey, @RealSteveCox. Remember when you said we should be allowed to shoot the unvaccinated? That was a really terrible thing to say, Steve!

Whenever anyone says “we all die from something” (or a variation thereof) to justify not taking precautions to help protect others in this pandemic, we should be allowed to shoot them.

“Why are you crying? We all die from something. For you, it’s that bullet in your gut.”

COVID is here to stay. You're going to get it. It almost certainly won't kill you but it could. You'll probably get cancer eventually too unless you die first. Lots of scary things out there. Death is certain. Suffering is unavoidable. Stop cowering. Live your life while you can.

Hey again, @DFisman. On a scale of 'one' to 'totally corrupt', how ashamed are you of those misleading statements you made a year ago, despite knowing better?

Pro-tip - you can't dodge this question by blocking me. And let me tell you, I won't back down until I get an answer!

Hello again, @CaulfieldTim, your entire feed consists of slandering and accusing people who are critical of The Science™. Yet, for months, you spread misinformation by claiming that it was necessary to vaccinate children to achieve herd immunity. To what degree are you corrupt?
